# *Greetings*

We take pleasure in presenting to you our 1950 catalog of Tall Bearded Iris and trust that it will prove to be of interest.

Most careful thought has been given to the varieties which are grown and offered to our growing list of satisfied customers. Out of over two thousand recognized varieties, we have selected those offered and described in this booklet as most worthy of your consideration. Among the list are varieties which have made great names for themselves in the past years, others which recently became most popular and are in great demand by Iris Lovers everywhere. There are also the best of the new introductions created by the leading hybridizers of the country which have every indication of becoming real hits and the Iris "greats" of tomorrow. You can depend on each and every one, with ordinary care, to give most satisfying results in your garden.

## LOCATION

Our Gardens are located one-half mile west of the village of Pleasant Valley, Bucks County, Penna. When entering Pleasant Valley, watch for our sign posts. Visitors are most welcome during the blooming season and we hope that you will pay us a visit. We believe that you will feel well rewarded for the time and effort.

## BLOOMING SEASON

The normal blooming season for this locality is from mid-May until mid-June. This season is undoubtedly a week or ten days behind normal. Our guess for the peak bloom this year would be from May 26th until June 6th. If you intend visiting us, you will probably see the most varieties blooming if you come during this period.

# A NEW IRIS

## *Introduction for 1950*

This year we have the pleasure and honor of introducing a new Iris, BISQUE, created by Dr. John Dolman of Swarthmore, Pa. Dr. Dolman is one of the East's leading Iris hybridizers and was for many years Regional Vice President of the American Iris Society for this district. Visiting Dr. Dolman's garden last May, this Iris immediately attracted our attention and so it is with pride and considerable enthusiasm that we offer it for the first time to the public.

## BISQUE

A rather late blooming plicata, in colors suggesting old fashioned bisque ice cream. The ground color is warm white; the falls slightly edged with yellow brown and the standards more heavily dusted with the same color, giving a reverse bicolor effect. The flowers are of medium size, ruffled, semi flaring, well poised and well spaced on strong stems. Like most plicatas it is seen at its best in a clump, standing alone and not too close to other Irises of stronger coloring. This Iris has been well tested and well liked, and a good stock has been built up, permitting a low introductory price.

\$3.00 each

## EVERY GARDEN SHOULD HAVE SOME IRIS PLANTINGS

No other flower gives such large returns for so little investment in time and money.

Iris are easy to grow, hardy and practically free from disease and most insect pests.

The range in color is more extensive than in any other flower and with the various blends, by-colors, plicates and variegatas, the variety to choose from is almost unlimited.

Iris not only give wonderful color value and added beauty to your garden, but are excellent as cut flowers for the house. A stalk, if cut when the top flower is opening, will last a week or longer.

Iris may attain this high honor only by being voted the favorite Iris of the year or by being one of the Hundred favorites over a period of ten years. ## PERMARK'S

PERmanent MARKers For Plants

Your Iris and other plants deserve the best identification and these markers are the answer to every particular gardener's dream. This attractive and durable label was developed by a practical gardener after year's of research, and is approved by leading horticulturists.

Permark labels are held firmly at an easy-to-read angle by bethanized, non-corrosive steel support and are made to prevent turning in the ground, accidental dislodgement and frost heaving.

Both sides of this harmonious, grey-green plastic label may be marked with any soft pencil and the writing remains legible for years, yet it is easily erased for re-use. Permark labels are always clean and free from spattered mud, being held eight inches above the ground. Permark labels and holders complete, postpaid:—

12 - \$1.70 — 25 - \$3.25 — 50 - \$6.00 — 100 - \$11.50  
Special waterproof pencil to use with above — 10¢ each
